Public Notice

Planned Issuance of a Renewed Acid Rain Permit for the City, Water, Light and Power (CWLP) Dallman Electric Generating Station

The Illinois Environmental Protection Agency (Illinois EPA) is proposing to issue a renewed Acid Rain Program Permit for the City, Water, Light and Power - Dallman Electric Generating Station at 3100 Stevenson Drive in Springfield pursuant to and consistent with Section 39.5(17)(f) of the Illinois Environmental Protection Act and Titles IV and V of the federal Clean Air Act. This permit would address the four electrical generating units now at this facility, Dallman Unit 31, 32 and 33 and Dallman Unit 4. The source's designated representative for these units under the permit would be P. J. Becker.

The renewed acid rain permit would reflect applicable regulatory requirements of the federal Acid Rain Program. As such, it would require the source to hold sulfur dioxide (SO₂) allowances under the Acid Rain Program to account for the SO₂ emissions of the affected units. An allowance is a limited authorization to emit one ton of SO₂ in or after a given calendar year. As the affected units are existing units under the Acid Rain Program, the source receives annual allocations of allowances from USEPA for these units. The source may also participate in the allowance trading with other sources to obtain additional allowances or transfer surplus allowances. The renewed permit would also address the applicable limit under the Acid Rain Program that applies to the emissions of nitrogen oxides of the affected units. The permit would also address emission monitoring and reporting requirements under the Acid Rain Program. The renewed permit would have a new expiration date, May 16, 2018, consistent with the expiration date of the current CAAPP permit for Coffeen. The permit would not affect the source's responsibility to meet all applicable federal, state and local requirements.

The Illinois EPA is requesting comments on the planned issuance of this renewed permit, as reflected in the draft of the renewed permit that has been prepared and discussed in the accompanying statement of basis. Comments must be postmarked by midnight July 15, 2016.

Persons wanting more information may review the draft of the renewed permit and accompanying statement of basis at the Illinois EPA's office at 1021 N. Grand Ave East in Springfield, 217/782-7027 (please call ahead to assure that someone will be available to assist you). Copies of these documents will be made available upon request.

Requests for information and questions should be directed to Jillian Hawkins, Office of Community Relations at the Illinois EPA, 1021 N. Grand Ave East, PO Box 19276, Springfield, Illinois 62794-9276, telephone 217-524-0922, TDD phone 217-782-9143, or jillian.hawkins@illinois.gov.
